PERSONAL PROFILE

I am a creative Front-end developer and UI designer with over 4 years of experience delivering end-to-end web solutions, from initial architecture to deployment. I am proficient in TypeScript, JavaScript, and React, with a strong focus on responsive design, performance, and accessibility. I specialize in translating complex UI/UX designs into clean, interactive interfaces and implementing secure data practices. I am committed to building user-centered, high-quality applications that align with business goals and elevate the user experience.

PROFESSIONAL EXPERIENCE

Lead Frontend Developer and UI/UX Designer (Wecraft)

04/2023 - 03/2026

Tunis, Tunisia

- Designed user-centric, responsive interfaces for web and mobile platforms, ensuring consistent user experience across devices.
- Developed key product features from scratch, including a financial statement calculator, monthly declaration (tax calculator template) tool, and an internal chat system, in collaboration with the back-end team.
- Collaborated with the backend team during peak workload periods by developing web services using Java and Quarkus, ensuring on-time feature delivery and smooth system integration.
- Reviewed the front-end code on GitLab to ensure maintainability, performance, and consistency across the development team.
- TypeScript, React, Angular, Redux, Java, Quarkus, JSDoc, Tailwind CSS, Figma, Gitlab, Jira**

Front End Developer and UI/UX Designer (Konnect Networks)

11/2021 - 04/2023

Lac, Tunisia

- Refactored and optimized front-end code base by eliminating redundancy, improving maintainability, and enhancing overall code quality.
- Built reusable and modular React components to streamline development and improve scalability across web.
- Redesigned web and mobile applications using Figma, aligning UI/UX with modern design principles and user expectations.
- Collaborated directly with the CEO to define and implement new features, including the "PayMe" page, from concept to deployment.
- Conducted manual QA and leveraged Hotjar recordings to identify bugs and usability issues, leading to targeted improvements.
- JavaScript, React, Redux, JSDoc, CSS, Figma, GitHub, Jira**

Technical Mentor (Social Hackers Academy)

06/2021 - 11/2021

GR, Greece (Remote)

- Delivered daily lectures and live coding sessions for multiple cohorts, covering React, Node.js, and JavaScript fundamentals.
- Led weekly workshops as part of the Women in Tech program at SHA, in partnership with Google, supporting women aspiring to enter the tech industry.
- Created and maintained updated course materials aligned with current tech standards and library versions.
- Reviewed student assignments and technical tests via GitHub, providing feedback and guidance through both async notes and live sessions.
- Managed GitHub organizations and repositories for each cohort, ensuring clean project structures and version control.
- JavaScript, React, Redux, HTML, CSS, GitHub, Git, Node.js, Express, MongoDB**

React Instructor (Rebootcamp Tunisia - RBK)

12/2020 - 06/2021

Ariana, Tunisia

- Created and delivered learning materials tailored to the HackReactor and Galvanize Lean Platform curricula.
- Led daily algorithm challenges and whiteboarding sessions to boost student problem-solving skills and technical communication.
- Conducted weekly assessments, live coding reviews, and personalized feedback sessions to track and support student progress.
- Mentored students in full-stack JavaScript development throughout an intensive 5-month bootcamp.
- **JavaScript, React, Angular, Redux, HTML, CSS, GitHub, Git, Node.js, Express, MongoDB, SQL**

TECHNICAL PROJECTS

React-mobile-app-button (Open source NPM package)

- Developed an NPM package for integrating download buttons for iOS App Store, Google Play Store, and Huawei AppGallery on websites using **React, TypeScript, CSS, and Babel**.
- Released the NPM package, achieving over **5,000 weekly** downloads, demonstrating significant adoption and engagement.
- Created comprehensive documentation for the package using **Storybook**, enhancing usability and developer adoption.

Uvey (Accounting solution)

- Built a full-stack financial management system to streamline business accounting workflows using **React, TypeScript, Redux, and Java**.
- Developed scalable, secure backend services with **Java** and **Quarkus**, ensuring efficient data processing and smooth integration.
- Leveraged **Redux** for maintainable state management across the application.
- Applied **Tailwind CSS** and custom **CSS** to deliver responsive, brand-consistent user interfaces.

Konnect Networks (Online payment solution)

- Refactored and developed a secure online payment platform using **React, JavaScript, Redux, Material UI, and CSS**.
- Implemented secure online transactions and money transfers, ensuring smooth user experience and platform security.
- Created **Pro account** management features, including balance tracking, transaction history, and multi-account support.
- Integrated additional services, such as mobile credit top-ups, enhancing platform functionality for users.

EDUCATION

JavaScript full stack software development (Rebootcamp Tunisia)

06/2020 - 11/2020

Ariana, Tunisia

- Full Stack Web Development.
- Focus Area: , **React, JavaScript, TypeScript, HTML, CSS, and Nodejs**

TECHNICAL SKILLS

JavaScript TypeScript React Angular HTML5 CSS3 Tailwind CSS
Sass UI/UX Redux Node.js MySQL MongoDB REST API
AJAX Axios Git
